EDUCATION

University of California, Santa Barbara

Santa Barbara, California

Bachelor of Science in Statistics and Data Science, Applied Mathematics

Expected Graduation Date: June 2027

- Relevant Coursework: Machine Learning, Probability and Statistics, Design and Analysis of Experiments, Regression Analysis, Numerical Analysis
- Statistics and Data Science GPA: 3.81, Applied Math GPA: 3.83, Overall GPA: 3.82

EXPERIENCE

Data Scientist Intern

October 2024 – August 2025

IDXExchange LLC

Remote

- Developed and refined a Python-based ML pipeline on 500k+ records, including feature engineering and preprocessing, for predictive analysis.
- Took ownership of training, evaluation, and final model delivery after initial collaborative phase.
- Documented methodologies and shared handoff materials to support continuity for future interns.

CLAS Math Tutor

October 2025 – Present

University of California, Santa Barbara

Santa Barbara, California

- Provided one-on-one tutoring and drop in services for lower division math, supporting 20+ students per week.
- Explained concepts, including algebra, calculus, and linear algebra, adjusted to fit different learning styles.

Data Journalist

October 2025 – Present

Daily Nexus

Santa Barbara, California

- Participated in team meetings and reviewed a data-driven article draft to improve clarity and readability.

Directed Reading Program Mentee (Incoming)

January 2026

UCSB Math Directed Reading Program

Santa Barbara, California

- Matched with a graduate student mentor to explore mathematical modeling.

PROJECTS

Close Price Prediction Model | *Python, Numpy, Pandas, Git*

October 2024 - August 2025

- Cleaned and preprocessed numerical and categorical features, including imputation and one-hot encoding, to prepare data for modeling.
- Built a RandomForest property price prediction model with hyperparameter tuning and data cleaning; achieved MAE = 101k, RMSE = 243k, MAPE = 18.21%, $R^2 = 0.91$.

Replication and Analysis of KNN-based Algorithm | *R, RStudio*

November 2025 – December 2025

- Reproduced a published KNN-based model by implementing the algorithm, replicating the experiments, and validating performance against reported benchmarks.
- Extended the study by evaluating alternative similarity measures and analyzing the effects of specific hyperparameters, with results documented in a paper-style report.

Statistical Modeling & Experimental Design Projects | *R*

May 2025 – June 2025

- Conducted statistical modeling and experimental design analyses on real datasets, including regression modeling, factorial designs, model diagnostics, and interpretation of results in R.

Interactive Calculator | *C++*

August 2024 – October 2024

- Built a C++ command-line calculator supporting expression parsing and persistent memory using linked lists.

TECHNICAL SKILLS

Programming: Python, C++, R, SQL, SAS

Libraries: pandas, NumPy, scikit-learn, PyTorch, Flask, ggplot2, dplyr

Tools: Github, Jupyter, VS Code, RStudio, Excel, LaTeX

Methods: Machine Learning, Regression, Experimental Design, Statistical Modeling
